Downloading
Please refer to the following link on the Exclaimer website:
http://www.exclaimer.com/signature-manager-exchange-edition/download

Installing
Download the 'Signature Manager Exchange Edition 2.2.0' installation file 'setup.exe' and run on the Microsoft Exchange Hub Transport Server and/or Microsoft Exchange Mailbox server (Exchange 2013 only). An MSI is available from support by contacting support@exclaimer.com.

Uninstalling
Uninstall can be achieved via the 'setup.exe' or MSI for the currently installed version of 'Signature Manager Exchange Edition' or via 'Add/Remove Programs' in Windows Server 2003 or 'Programs and Features' in Windows Server 2008 & 2012.

The configuration files are located in the following folder and will not be removed as part of the uninstall process:

Operating System	File Location
Windows Server 2003 R2 x64	\Documents and Settings\All Users\Application Data\Exclaimer Ltd\Mail Disclaimers
Windows Server 2008 x64 Windows Server 2008 R2 x64 Windows Server 2012 Windows Server 2012 R2 Windows Small Business Server 2008 Windows Small Business Server 2011	\ProgramData\Exclaimer Ltd\Mail Disclaimers

The uninstall process will not lose any of your configuration or settings. However as a backup precaution you may wish to export your configuration.

Export Steps
1.   Open the Exclaimer Console.
2.   Select the 'Exclaimer' node.
3.   Open the 'Action' menu.
4.   Select 'Export Configuration...'
5.   Select a location and filename for the export.
6.   Press Save.

This will export all your settings including all your templates and licensing data.

Upgrading
Upgrading can be achieved via the 'setup.exe' which will perform an in-place upgrade.

Fixed Issues
- When a {Conditional Field} or a {Composite Field} was used inside a {List of Fields} the Separator was missing.
- Row in Smart Table was not displayed when 'suppress field' was not present in template.
- Certain non-US ASCII characters in RTF files used in 'Content From File' were not displayed correctly in HTML preview and HTML messages.
- Unicode characters were displayed as questions marks when pasted from Notepad.
- Certain Exclaimer event log entries were incorrectly appearing in the application log.
- An exception was thrown when importing a template that had a {Custom Image} containing a {Field}.
- In certain scenarios the reply/forward message and signature content were applied at the end of an email conversation.
- A semi colon was added to the end of the line of HTML content when the content included an ampersand.

Changes and Enhancements

- Improved error handling when NETWORK SERVICE account does not have access to the Template Library folder.
- Improved compatibility with Anti-virus applications.
- {Original Message} fields now added to templates when imported from Exclaimer Signature Manager Outlook Edition.
